INFINITY

UIA WORLD CONGRESS OF ARCHITECTS
BELLA CENTER COPENHAGEN

90% RECYCLING / 100% HONESTY

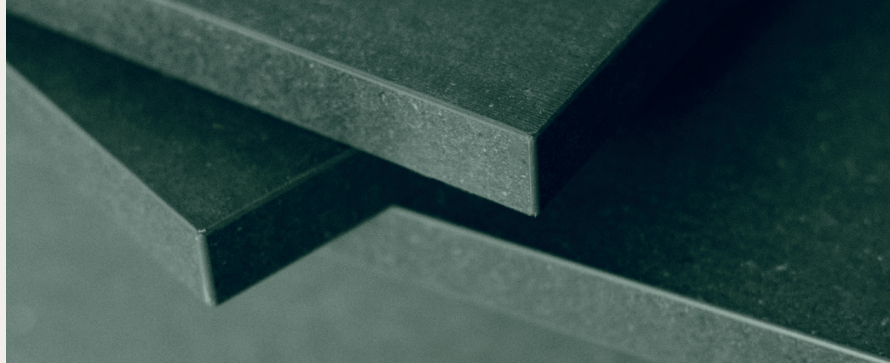

INFINITY IS 90% RECYCLING & 100% HONESTY

The INFINITY design is our 2023 take on future furniture and interior design concepts. Our approach is defined by conscious simplicity and honest aesthetics. Our chipboards are based on more than 90% recycled biomaterials. All fronts and panels have state-of-the-art edging made from minimum 50% recycled PP components. Both materials can be recycled and reused infinite. Hence the product name. Infinity is UV lacquered for a practical matte top finish in two colors, Leaf (dark green) and Sky (light gray). The transparent colors add subtle material details that emphasizes the uniqueness of each chipboard.

FULL MATERIAL TRANSPARENCY AND PURITY ARE PIVOTAL WORKING TOWARDS FULL CIRCULARITY.

LESS, BETTER & MORE RESPONSIBLE

Less, Better & More Responsible are key terms towards a sustainable future. Less is about reducing overall material usage and lowering carbon footprint. Better will prolong product lifespan and optimize user involvement. Responsibility is rethinking how and what we produce, aiming for sustainability and balance in all aspects of our business. Challenging traditions, norms, and materials as we move forward.

LESS, BETTER & MORE RESPONSIBLE IS OUR MINDSET AND DESIGN PROVERB.

SMALL LIVING INTERIOR CONCEPT

Compact spaces require smart and functional storage solutions. Small space dwellers are challenged to reorganize and reevaluate life and living conditions.

Storage spaces are maximized from floor to ceiling, and wall to wall. Leaving a compact kitchen design with a significant framed furniture expression. All handles are cradle-to-cradle certified.

The worktop and backsplash, are likewise, based on recycled chipboard with a Fenix NTM Laminate in super matte black surface for depth, and contrast to the prime kitchen workspace area. Fenix is known for its unique practical and aesthetic material properties with anti-fingerprint and anti-bacterial features.

Our four-element compact kitchen are equipped with complete kitchen appliances from AEG – though without showcasing a removeable cooking top. The curated range are chosen for its low impact and usage requirements.

The bathroom furniture is a single storage unit with flexible space for basic bath- and home utilities. The bathroom tabletop is made from Corian with an integrated seamless sink.

Vola taps in both kitchen and bath, are carefully chosen statements celebrating timeless and long-lasting Danish design icons.

CUBEZERO / INTERIOR BY SVANE KØKKENET

Svane Køkkenet is part of TCM Group, the third largest kitchen, bathroom, and storage furniture manufacturer in Scandinavia. We are based in Jutland, Denmark, where our production facilities support forty showrooms in Denmark and Norway. We rely on local production by skilled hands and visionary foresight.

SVANE KØKKENET IS RENOWNED FOR CONTEMPORARY DESIGN, INNOVATION, AND FUNCTIONALITY.
